# WHY VIRTUAL REALITY TRAINING (VRT)?

## Traditional vs Virtual reality

It engages senses, emotions and cognitive functions of the brain, tapping into the most powerful aspects of retention

Is becoming one the most powerful learning technologies because many participants around the world can be accessed simultaneously through the network

Increases efficiency and reduces up to 50% of the costs for the trainer and trainees

Drastically improve the level of attention and engagement measured. And whoever pays more attention, retains the knowledge learnt better
